European Pensions

AWARDS 2020

Pension Scheme Administrator of the Year

Previnet Outsourcing Solutions

European Pensions

AWARDS 2020

WINNER

Pension Scheme Administrator of the Year

*Pictured - Prevnet's Martino Braico:
"Looking at these trophies, I realise it was
worth trying: administering cross-border
pensions is possible!"*

The importance of high quality and seamless pensions administration has been highlighted more than ever in recent months, thus the award for Pension Scheme Administrator of the Year is arguably more poignant than it has ever been.

A previous winner in this category, the proud victors for 2020 were Prevnet Outsourcing Solutions, a firm that is passionate about administration and, said the judges, "continues to innovate in order to meet the needs of multi-country schemes despite the challenges this presents".

A specialist provider, Prevnet provides services for a range of pension funds across Europe. It has developed its own proposition capable of delivering administration solutions to local and cross-border pension schemes, to include pan-European pension schemes, which operate in multiple currencies and funds, that have cross-border employers and offer their internationally based members multiple investment profiles.

Having been in the market for over 20 years, the judges were impressed that this firm continues to develop its proposition, evolving as the market does, with a focus on meeting customer needs, whatever they may be. Its tailor-made services, flexibility, and scalability, combined with its

competitive pricing, have helped it become a leader in the European administration space.

Prevnet's submission showcased a range of high-profile clients that have enjoyed lengthy relationships with the firm, which also reinforces Prevnet's ability to work with a range of clients with varying needs.

Prevnet also prides itself on its multi-channel communication offering – ad hoc solutions are offered to communicate to members, while solutions for different devices are provided to give members both online and mobile experiences. Where relevant, dedicated learning tools with a multi-lingual approach are also offered to engage members.

Other significant highlights that impressed the judges included Prevnet's rule-based engine, which is made up of layers that can be customised according to clients' needs, plan rules and local regulations; as well as its innovative business intelligence tools, such as customisable dashboards.

Additionally, its open investment platform allows members to choose their preferred investment strategy – all in full compliance with local regulations and plan rules. A Risk Profiler tool helps members to understand their investment goals, and a Pension Modeller tool assists members in making customised pension projections according to their own attitudes and preferences.

All in all, Prevnet offers a comprehensive outsourcing solution capable of combining cross-border activity and country-related peculiarities, all managed by a team that is dedicated and passionate about what it does. Finally, as the judges stated, this is "an impressive solution that has already proven useful but will be vital in the coming decades as working across borders becomes the norm".

Congratulations Prevnet – a well-deserved win.
